EDUCATION

York University, Lassonde School of Engineering — **North York, ON, Canada**
Hons. Bachelor of Science, Computer Science — *Sept 2022 - Aug 2027*

COURSES

Advanced OOP **|** Discrete Math **|** Calculus **|** Linear Algebra **|** Theory of CS **|** Elementary Probability | Computer Organization **|** Advanced Data Structures & Algorithms **|** Database systems **|** Operating Systems **|** Software Design **|**E-commerce systems

WORK EXPERIENCE

Genesys — **Toronto, ON, Canada**
Software Developer in Test Intern — *May 2026 - Dec 2026*

- Develop and maintain Kotlin-based API test cases and Playwright end-to-end UI tests for application features, improving automated validation of application workflows.
- Investigate failed automated tests and software defects using Jenkins pipeline results, application logs, and New Relic monitoring; collaborate with developers and QA engineers to troubleshoot root causes.
- Contribute to Agile development and quality workflows through Git-based changes, test debugging, regression coverage, and continuous integration practices.

Dayforce — **North York, ON, Canada**
QA Analyst Intern — *Sept 2024 - Apr 2025*

- Designed and executed **300+** manual test cases across **60+** user stories, covering functional, UI, and regression scenarios.
- **Automated 20+ E2E/UI regression test cases using Playwright (TypeScript/JavaScript)** for critical workflows, improving **test coverage** and **release readiness** through reusable components.
- Created and ran **ad-hoc SQL (SQL Server) queries** to validate backend data, set up test data, and support defect triage/root-cause analysis.
- Logged and tracked **40+** defects in Jira through the SDLC with clear repro steps and severity/priority; verified fixes and performed regression re-testing.

VOLUNTEER EXPERIENCE

Lassonde Fall Campus Day — **North York, ON, Canada**
Keynote Presenter — *Sept 2023*

- Reached and influenced over **200** attendees, including **125** prospective students and **75** parents.
- Received positive feedback from **90% of attendees**, resulting in a **15%** increase in prospective student inquiries.
- Contributed to crafting engaging presentations, leading to a notable **20%** rise in overall attendee satisfaction

RELATED PROJECTS

AI Form Autofill App | Google Slides, Excel, Spreadsheets, Microsoft Word **|** BEST Hackathon Project

- The AI-powered autofill app optimizes form completion by intelligently populating fields, enhancing efficiency, accuracy and user experience by **reducing form completion time by 40%**.
- **Increased data accuracy by 30%** through intelligent autofill functionality and streamlined administrative processes, **saving an average of 2 hours per user per week**. Project link

Cruise Critic Database & Analytics | SQL Server, Power BI, DAX

- Extended an University course-based database project by building a Power BI star-schema analytics layer using SQL and DAX to analyze **revenue, profitability and destination demand** for a Cruise Critic Cruise Review website. Project link

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, C++, Kotlin, JavaScript, TypeScript, SQL, HTML, CSS, React.js, Node.js, Pygame
Software Development & DevOps: REST APIs, Microservices, Distributed Systems, OOP, Git, AWS, Azure, Google Cloud, Docker, Jenkins, CI/CD, Linux, Shell Scripting.
Testing & Tools: Playwright, Selenium, Postman, Jira, New Relic, Agile/Scrum, SDLC, Debugging, Power BI, DAX, Excel, Google Sheets, Figma, npm.
